Partnering companies, research institutes and universities

The scholarship lays the foundation for individual career opportunities.

For whom? For how long?

- Female students at the beginning of their Master's studies in the STEM subjects, 55 scholarship holders per semester
- Three schools in parallel over a period of 13 months

Main topics

- Shaping your own career
- Leading and steering yourself and others, current leadership concepts and exciting approaches to dealing with complexity
- Developing and managing innovations
- Establishing networks
- Getting to know a diverse range of corporate worlds

Graduation

Diploma Supplement and Certificate 19.10.2022

"I always had a lot of fun at Femtec and also learned a lot for life."

"The soft skills I learned in workshops and trainings help me to communicate better with others, to present myself and also to assert myself, both in my job and in everyday life. However, the greatest treasure that Femtec has given me is the network of motivated and committed female engineers and natural scientists."

Femtec alumna

5. How do I apply?

Online
